Histology

Webinar
Tips & Tricks to Better Histology webinar series
Fiona Tarbet used her 35+ years of histology experience to discuss a multitude of Tips & Tricks to overcome histology pitfalls in research, covering processing to clearing.

Fiona has delivered these talks at the National Society for Histotechnology as part of their comprehensive workshops for 3 years consecutively. Want some useful tips? Watch PART 1 and PART 2.

Tips & Tricks Questions and Answers
Research is all about asking questions and seeking answers, and when customers talk, we listen. Our infographic answers several questions we received during our Tips & Tricks webinar series.

Customer Limelight

When science gives you lemons, we give you the Limelight
Do you want to share your joke about research?
A good laugh is a great way to start the day! Send us your best science-related joke and it will be randomly selected and featured in our next issue of the newsletter with full accreditation of course.

Image Insey
Let your imagination run wild
Have you ever looked at your histology or multiplex images and thought it looks like a galaxy far, far away or seen a face? Get creative and send us those images. No need for scientific accuracy – play with colors, add a cartoon! Give your masterpiece a unique name and send it to us by April 30th, 2021.

The submitter of the winning image will be contacted by us and will be featured in our next article, showcasing your original multiplex IHC & ISH image and a description of their research.

Our joke jokers and/or images to researchinks@lebacubiosystems.com
